

MEETING THE PROJECT MANAGEMENT CHALLENGE

2004

Biography

Ronald Johnson, P.E.

Chief, Systems Management Office - Ames Research Center

Since 1999, Mr. Johnson has been the Chief of the Ames Systems Management Office (SMO) where he is responsible for independent assessments of Center programs/projects, and promoting development and deployment of project management and systems engineering tools and training. He is a member of the Ames Program Management Council and the Agency's Program Management Council Working Group. Prior to coming to the SMO, he was the Center's ISO Executive Representative and co-led the implementation of the Center-wide ISO 9000 quality system. He held various line management positions in wind tunnel facilities organizations and managed modernization improvements to several wind tunnels and related facilities.

He began his career in 1979 at Ames as a wind tunnel facility engineer. He graduated from the University of California, Santa Barbara with a B.S.M.E. in 1979 and was licensed as a Professional Engineer in 1982.
